

Nativr

Who we are and
what we do

Mission

Nativr is a student-led project aiming to bridge the language barrier experienced by non-English speakers in the U.S. equitably by creating a free, on-demand learning platform.

Equity is important to us. That is why Nativr is 100% free to access, free to use, and free to learn from for all learners.

Audience

Nativr is targeting English learners with a Spanish language background in the  United States. Our content is tailored towards beginner and intermediate level learners.

Delivery

All course content will be delivered on-demand through the Nativr website. The Nativr team will be available by e-mail to answer any questions and provide learner support.

No internet? No problem. Nativr plans to add offline functionality by allowing learners to download course content.

Delivery

- 1** User accesses the Nativr website (nativr.com)
- 2** User creates a free account on the Nativr website
- 3** User starts course and progresses through lessons
- 4** User gets personalized feedback (subject to resources)
- 5** Nativr team is available by e-mail to support users by answering questions
- 6** User completes course; receives certificate of completion

Support from the Nativr team in both English and Spanish will be available to learners to make it as accessible as possible.

Team

The Nativr team is split into the Executive Board and contributors. The Executive Board is Nativr's leadership team and is composed of all leads of each team.

Contributors are assigned to a specific team, led by a member of the Executive Board.

■ Nativr currently has six teams.

Get Involved

You can get involved with Nativr by becoming a contributor or financially supporting our work.

If you are interested in becoming a contributor, please apply on our Linktree:
